

W.A.T.A.
PARTNER RESOURCE

Partner Portal Guide

How to sign in, understand your data, and follow every water filter from distribution through follow-up.

OPEN THE REGISTRY

registry.cleanwata.org

Read-only, partner-scoped access

You see only the organizations approved for your email. The portal does not edit mWater or Airtable.

Prepared for W.A.T.A. partners

August 2026

Screenshots use aggregate or synthetic records.

Sign in and get oriented

Three steps take you from the secure sign-in screen to your approved partner view.

The Home screen confirms the registry is connected and shows the tools available to you.

- **Open registry.cleanwata.org**

Use a modern browser on a phone, tablet, or computer.

- **Verify your email**

Enter the exact email approved in Airtable. Cloudflare sends a one-time code; you do not need a Cloudflare account.

- **Confirm your view**

Your partner name appears in the Viewing menu. W.A.T.A. administrators may switch between approved partner scopes.

If access is denied

Ask W.A.T.A. to confirm that your Airtable Surveyors record has the correct Email, Active status, Role, Team, and Portal Access enabled.

Never forward your one-time verification code.

Know the six main areas

The left menu stays consistent. The partner scope at the top controls the data summarized on every page.

01

Home

Connection status, W.A.T.A. tools, and a quick impact snapshot.

02

Impact

Filters, surveys, people reached, communities, surveyors, and open issues.

03

Filters

Searchable registry records with family, community, status, and dates.

04

Follow-ups

Last visit, next scheduled milestone, and current follow-up status.

05

Issues

Actionable data-quality problems identified by operational IDs.

06

Settings & help

In-portal explanations of access, privacy, updates, and navigation.

Country filters

On Filters, Follow-ups, and Issues, use the flag buttons to show All authorized countries or one country at a time.

Dark mode changes the appearance only; it does not change your permissions or data.

Find the right filter

Search, narrow by country, and scan the most useful fields without opening every record.

Privacy-safe example: the screen is shown before household rows appear.

Search

Enter a filter ID, country, deployment, community, or family name.

Filter by country

Tap a flag button. All combines countries inside your authorized partner view.

Open a record

Select the Filter ID to see the full operational record and timeline.

What the columns mean

Country / program	country, deployment, partner
People	household size recorded
Status	drop-off, distributed, or other stage
Distribution date	first recorded setup date
Next follow-up	next calculated milestone

Tip

If a field looks wrong, note the Filter ID before contacting W.A.T.A. That ID is the safest way to trace the record.

Read a filter record

A filter page brings the program, household, field ownership, and follow-up timeline together.

- Next action**
Sep 2, 2026 · Assigned to Demo Ambassador B

Read-only preview

01 Filter & program

Filter ID, partner, deployment, status, and source response.

02 Household

Family, household code, number of people, and community.

03 Field ownership

Who set up the filter, surveyor, follow-up owner, and distribution date.

04 Follow-up timeline

Distribution, latest completed visit, and next action.

Synthetic example—no real household information is shown.

Trusted partner view

The portal can show operational household details to approved partners, but health survey responses and household coordinates are not displayed.

Understand your impact

The Impact page turns registry records into a quick, scope-aware program summary.

The screenshot shows the W.A.T.A. Impact dashboard. On the left is a dark sidebar with navigation links: Home, Impact (selected), Filters, Follow-ups, Issues, and Settings & help. At the bottom of the sidebar is a status indicator: "Live · read-only". The main content area has a header with "VIEWING All W.A.T.A." and a user profile for "Cyrus Maroofian, W.A.T.A. Admin". Below the header is a section titled "All W.A.T.A." with the subtitle "Combined operating view · Authorized operating view". The main section is titled "Impact dashboard" with the subtitle "Live summaries from the W.A.T.A. Filter Registry." It contains four metric cards: "FILTERS TRACKED" (340 Asset Registry), "SURVEY EVENTS" (480, 290 distributions · 146 follow-ups), "PEOPLE REACHED" (1,769, 290 recorded families), and "OPEN ISSUES" (8, Needs review). Below this is a section titled "Program details" with the subtitle "Operational totals for the selected partner scope." It contains four more metric cards: "COMMUNITIES" (27 Recorded communities), "ACTIVE SURVEYORS" (34 Current field team), "DISTRIBUTION SURVEYS" (290 Recorded events), and "FOLLOW-UP SURVEYS" (146 Recorded events).

Live totals change as Airtable is updated and the ingestion workflow runs.

Filters tracked

Current registry records in your selected scope.

Survey events

Distribution plus follow-up events.

People reached

People recorded across linked families.

Open issues

Portal-visible records that need review.

Before comparing numbers

Check the Viewing menu, selected country button, and last update. Totals are always calculated from the data currently available for that scope.

Use the follow-up schedule

The schedule keeps every distributed filter visible—even when a visit is late.

W.A.T.A.

Follow-up schedule

340 filter records with follow-up information.

All 340 **Colombia 340**

FILTER ID	COUNTRY / PROGRAM	COMMUNITY	LAST FOLLOW-UP	NEXT FOLLOW-UP	STATUS
SQAJ255851	Colombia Colombia - OTC One Thread Collective	Tocoromana	—	Sep 2, 2026	Pending
SQAM251962	Guatemala Guatemala - LWH & HSICF Long Way Home	951128211	—	Jul 20, 2026	Pending
SQAC253488	Guatemala Guatemala - LWH & HSICF MMV	Mujeres Mejorando Vidas	—	Jul 9, 2026	Pending
SQAF252391	Guatemala Guatemala - LWH & HSICF Long Way Home	San Juan Comalapa	—	Jun 30, 2026	Pending

Live · read-only

Operational IDs and community names help field teams locate the correct record.

● Pending / upcoming

The filter has a future milestone and no completed visit for that milestone yet.

● Overdue

The milestone date has passed. The filter remains in the registry and still needs a visit.

● Completed follow-up

Once the follow-up reaches mWater, the ingestion workflow updates Airtable and the portal reflects it.

A late visit still counts

If the first follow-up happens 200 days late, it is still recorded as the first completed follow-up. Airtable then calculates the next milestone from the configured schedule.

If the date is blank

Check whether the filter is distributed, has a valid distribution date, and is linked to the correct registry record.

Resolve a data-quality issue

Issues surface problems in the raw survey flow without displaying health responses.

Missing QR Code -	Colombia Colombia - OTC One Thread Collective	Missing QR Code	—	Follow-Up	Aug 15, 2026	Open

Live · read-only

The page identifies the affected program, source survey, date, status, and operational record.

What to send W.A.T.A.

- Issue ID
- Filter or response ID
- Problem shown
- Survey source and date
- What you believe is correct

What happens next

W.A.T.A. traces the operational ID back to mWater or Airtable, corrects the source or linkage, runs the ingestion workflow, and confirms the portal projection.

Protect household privacy

Do not forward health answers, coordinates, or full household screenshots in chat. Operational IDs are enough to begin troubleshooting.

Get help and share safely

The portal is designed to be your first reference. Most fixes happen in the source systems—not in the portal.

The screenshot shows the W.A.T.A. portal interface. On the left is a dark sidebar with navigation links: Home, Impact, Filters, Follow-ups, Issues, and Settings & help (highlighted). The main content area has a header with 'VIEWING All W.A.T.A.' and a user profile for 'Cyrus Maroofian, W.A.T.A. Admin'. Below the header is a 'Settings & help' section with the subtitle 'All W.A.T.A. · Portal guide'. The main content is titled 'How this portal works' and includes a subtitle 'A practical guide to navigating and interpreting the W.A.T.A. registry.' There are six numbered cards: 01 Choose a view, 02 Filter by country, 03 Open a filter, 04 Read follow-ups, 05 Resolve issues, and 06 Understand updates. At the bottom left of the sidebar, it says 'Live · read-only'.

Settings & help contains the same core guidance inside the portal.

I cannot sign in

Use your exact approved email. Ask W.A.T.A. to verify Active, Role, Team, and Portal Access in Airtable.

My data is missing

Confirm the survey is final in mWater and allow the ingestion workflow to run. Share the operational ID if it remains missing.

A field is wrong

Correct the source when appropriate; do not try to edit the read-only portal.

Totals look different

Check the selected partner scope, country filter, and last update before comparing reports.
